◆ 教科書43ページ、46ページと同じ図です。切り取って使いましょう。

The figure consists of five identical grid-based diagrams arranged in two rows. Each diagram shows a shaded quadrilateral ABCD on a grid. The vertices are labeled A, B, C, and D. The top side AD is 1 cm long, as indicated by a dashed line and '1cm' label. The quadrilateral is composed of several smaller triangles and rectangles. The first three diagrams are identical. The last two diagrams show the quadrilateral with a dashed line segment DE drawn from vertex D perpendicular to the extension of side BC, with a right-angle symbol at E.
